## **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

### ***Reasons for allowance***

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest a method and an apparatus of an optoelectronic package comprising a base chip having V-groove; a wick stop disposed between rear and front portions of a fiber array having an array V-groove and an optical fiber having an angled endface disposed in both V-grooves to couple the chip and array.

The examiner agrees with applicant's arguments on pages 6-7 in the remarks accompanying the amendment of September 24, 2003, and fully concurs that neither Morikawa nor Clark reference discloses or suggests the limitations above.

Claims 1-28 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sherrer et al. (U.S. Patent 6,215,946 and 6,363,201) disclose a V-groove chip having a wick stop trench to prevent the movement of adhesive. Sherrer

Art Unit: 2874

et al. (U.S. Patent 6,526,204) disclose an optical fiber array having grooves in a front face of the array to control the flow of glue when the array is glued to an integrated optic. And Steinberg et al. (U.S. Patent 6,595,700) disclose an optoelectronic package having VCSELs that are properly spaced apart from optical fibers (see figure 1).

However, these references also fail to disclose or suggest an optical device having the limitations above.
